Subject: Re: Road to Crandall Drill Holes

Tom,

We will gladly accommodate this for this year, providing the Forest will update their Special Use Permits. However, I don't envision keeping it open for as long as a land exchange may take. I hope there is some comfort level that your two agencies can reach that will help us to move along on the reclamation.

We will continue to work with you and the Forest to ensure that our efforts are not at cross-purposes with yours, but hope not be put into a situation where we must decide between competing interests.

Thanks for responding so quickly.
Dana

The road should remain open. The Manti LaSal Forest and SITLA agreed to pursue exchange of the SITLA lands for USFS lands.

Pam and Tom,

I hope your meeting went well last week, and that you were able to come to a suitable agreement regarding the land on which the road to the Crandall Canyon drillholes lies. We at the Division do not want to insert ourselves in the situation, since it is not our place. We do need to know if the road should be held open for another year, or reclaimed now. If we are requiring reclamation now, Mr. Shaver needs to know so that he can put the work out to bid. If we are leaving it another year, he needs to change his MRP, and I think he would also need an updated Special Use Permit from the Forest.

Please let me know if you would like to discuss this by phone or in person.

Thank you,

Dana Dean, P.E.
